

Interested in becoming SAFe® Scrum Master certified?

SAFe® Scrum Master with SSM Certification

Overview

The Scaled Agile Framework® (SAFe®) provides proven success patterns for implementing lean-agile software and systems development up to enterprise scale.

Course Outcomes

This two day interactive training program provides attendees with an understanding of the role of a Scrum Master in a SAFe® enterprise. Unlike traditional Scrum Master training that focuses on the fundamentals of team-level Scrum, this course includes learning the key components of Agile at scale development, how it is facilitated and planned.

Upon course completion, you will be able to:

- Describe Scrum in a SAFe® enterprise
- Facilitate Scrum events
- Facilitate effective Iteration execution
- Support effective Program Increment execution
- Support relentless improvement
- Coach Agile teams for maximum business results
- Support DevOps implementation

Duration

2 days

Benefits

Benefits to the Individual

- SAFe® Scrum Master (SSM) certification signifies that people are prepared to perform the role of Scrum Master in a SAFe® environment, increasing their value to teams and organisations that are implementing SAFe®.
- Achieve better communications, alignment and control with agile projects and teams
- Potential to rapidly adopt a proven approach

Benefits to the Organisation

- Focus on delivery of business value enables faster strategic change at lower cost and lower risk, and organisations applying SAFe® are getting significant benefits including increased productivity and employee satisfaction improved quality and faster time to market
- Achieve better communications, alignment and control with agile projects and teams
- Potential to rapidly adopt a proven approach rather than developing an organisation specific process

** Exams are included in price and duration of courses.*
